# NOMENCLATURE AVIGLASS

## DOORS & WINDOW SYSTEMS

- 

**Doors and windows** Design system that adapts to wall and floor-to-ceiling and floor-to-ceiling installations.
- 

**Facades and great heights** Enveloping system, with high wind resistance, with panoramic views that allow the entry of natural light of natural light.
- 

**Sliding** Sliding opening systems with adaptable solutions adaptable to the specific needs of each project.
- 

**Panoramic views** System focused on creating open and ventilated ventilated environments. Less aluminum, more glass.
- 

**Against hurricanes** Guaranteed system in environmental protection and extreme climates.
- 

**High-strength resistance** Supports heavy loads.

## TYPES OF GLAZING

- 

**Monolithic** Glass sheet consisting of a single sheet, with a variety of thicknesses.
- 

**Laminated** It is a type of safety glass that is composed of of two or more layers of glass bonded together by an intermediate layer of plastic material.
- 

**Insulated** Monolithic or laminated crystals separated by a air or gas chamber, which generate customized thermal effects effects.

## SYSTEMS ENHANCE

- 

**Hermetic** System designed to create impenetrable structures by air, water or any element.
- 

**Acoustics** A system that significantly reduces outside noise and allows adequate hearing levels
- 

**Low-E** System designed to control environmental effects, reducing the use of air conditioning equipment.
- 

**What is a monolithic?** It is a single sheet of glass that is manufactured by flotation process.
- 

**What is laminated glass?** They are two crystals held together by an interlayer. an intermediate layer.
- 

**What is an insulated?** Combination of glass panes with an intermediate air space that creates an additional barrier that decreases air-to-air temperature transfer.
- 

**What is tempered glass?** Processed by thermal or chemical treatments to increase its resistance compared to normal glass.

# DOORS & WINDOW SYSTEMS

Our experience has led us to design and perfect solutions, taking into account every detail of each project. The Doors & Window Systems are made up of these 4 elements.

**GLAZING**

We take and include innovations in technology worldwide to provide solutions that guarantee the objective of each project.

**WINDOWS**

Our team seeks follow and create trends, offering a unique and modern style, focused on solutions that are timeless while maintaining quality and functionality over time.

**OPERATOR**

We design projects to be able to offer our clients variety and options that increase the functionality and design of the solutions; leaving the common offer in the market, giving a product of exalted quality.

**OPENING**

We create The Doors & Window Systems that guarantee the correct use of the opening solution of the project, meeting the specific needs of the client.

# SEICENTO SYSTEM

Types of systems

**NAMI**  
HURRICANE CERTIFICATION

**Seicento:** Original system for projects of high aesthetic level, quality and resistance. It is characterized by providing a functional solution and a high sense of innovation.

**Forte:** Evolution of the original SEICENTO system, focused on creating spaces with a low perception of the need for a door, high weight resistance and practical opening mechanisms.

**Forte Minimal:** Reinforced evolution of the SEICENTO MINIMAL system, which offers hurricane-certified projects while maintaining high-level aesthetics.

**NAMI**  
HURRICANE CERTIFICATION

# TYPE OF GLAZING ● ●● ●●●

System designed to support and highlight any type of glass and configuration. Recommended for projects requiring large openings in sliding systems.

● From **6 mm** to **30 mm** glazing.

# SYSTEM TYPE

A system designed to meet the aesthetic needs of any modern international development. Using strong and durable aluminum, our **SEICENTO** system offers a guarantee superior to standard market options, ensuring design and quality for your project.

- High-performance gates.
- Specialized system for high rise projects.
- Modern profiles with straight, defined cuts, without curves.
- Electro-painted, anodized or sublimated finishes.
- Multi-rail, with no limit to the number of rails.
- Seicento runs 5 mm above the floor, whereas the
- Seicento Forte saves 1 cm of the baseboard in the rail to provide greater safety.
- The Seicento minimal has a greater panoramic view due to the dimensions of its overlaps, which can be simple or reinforced.

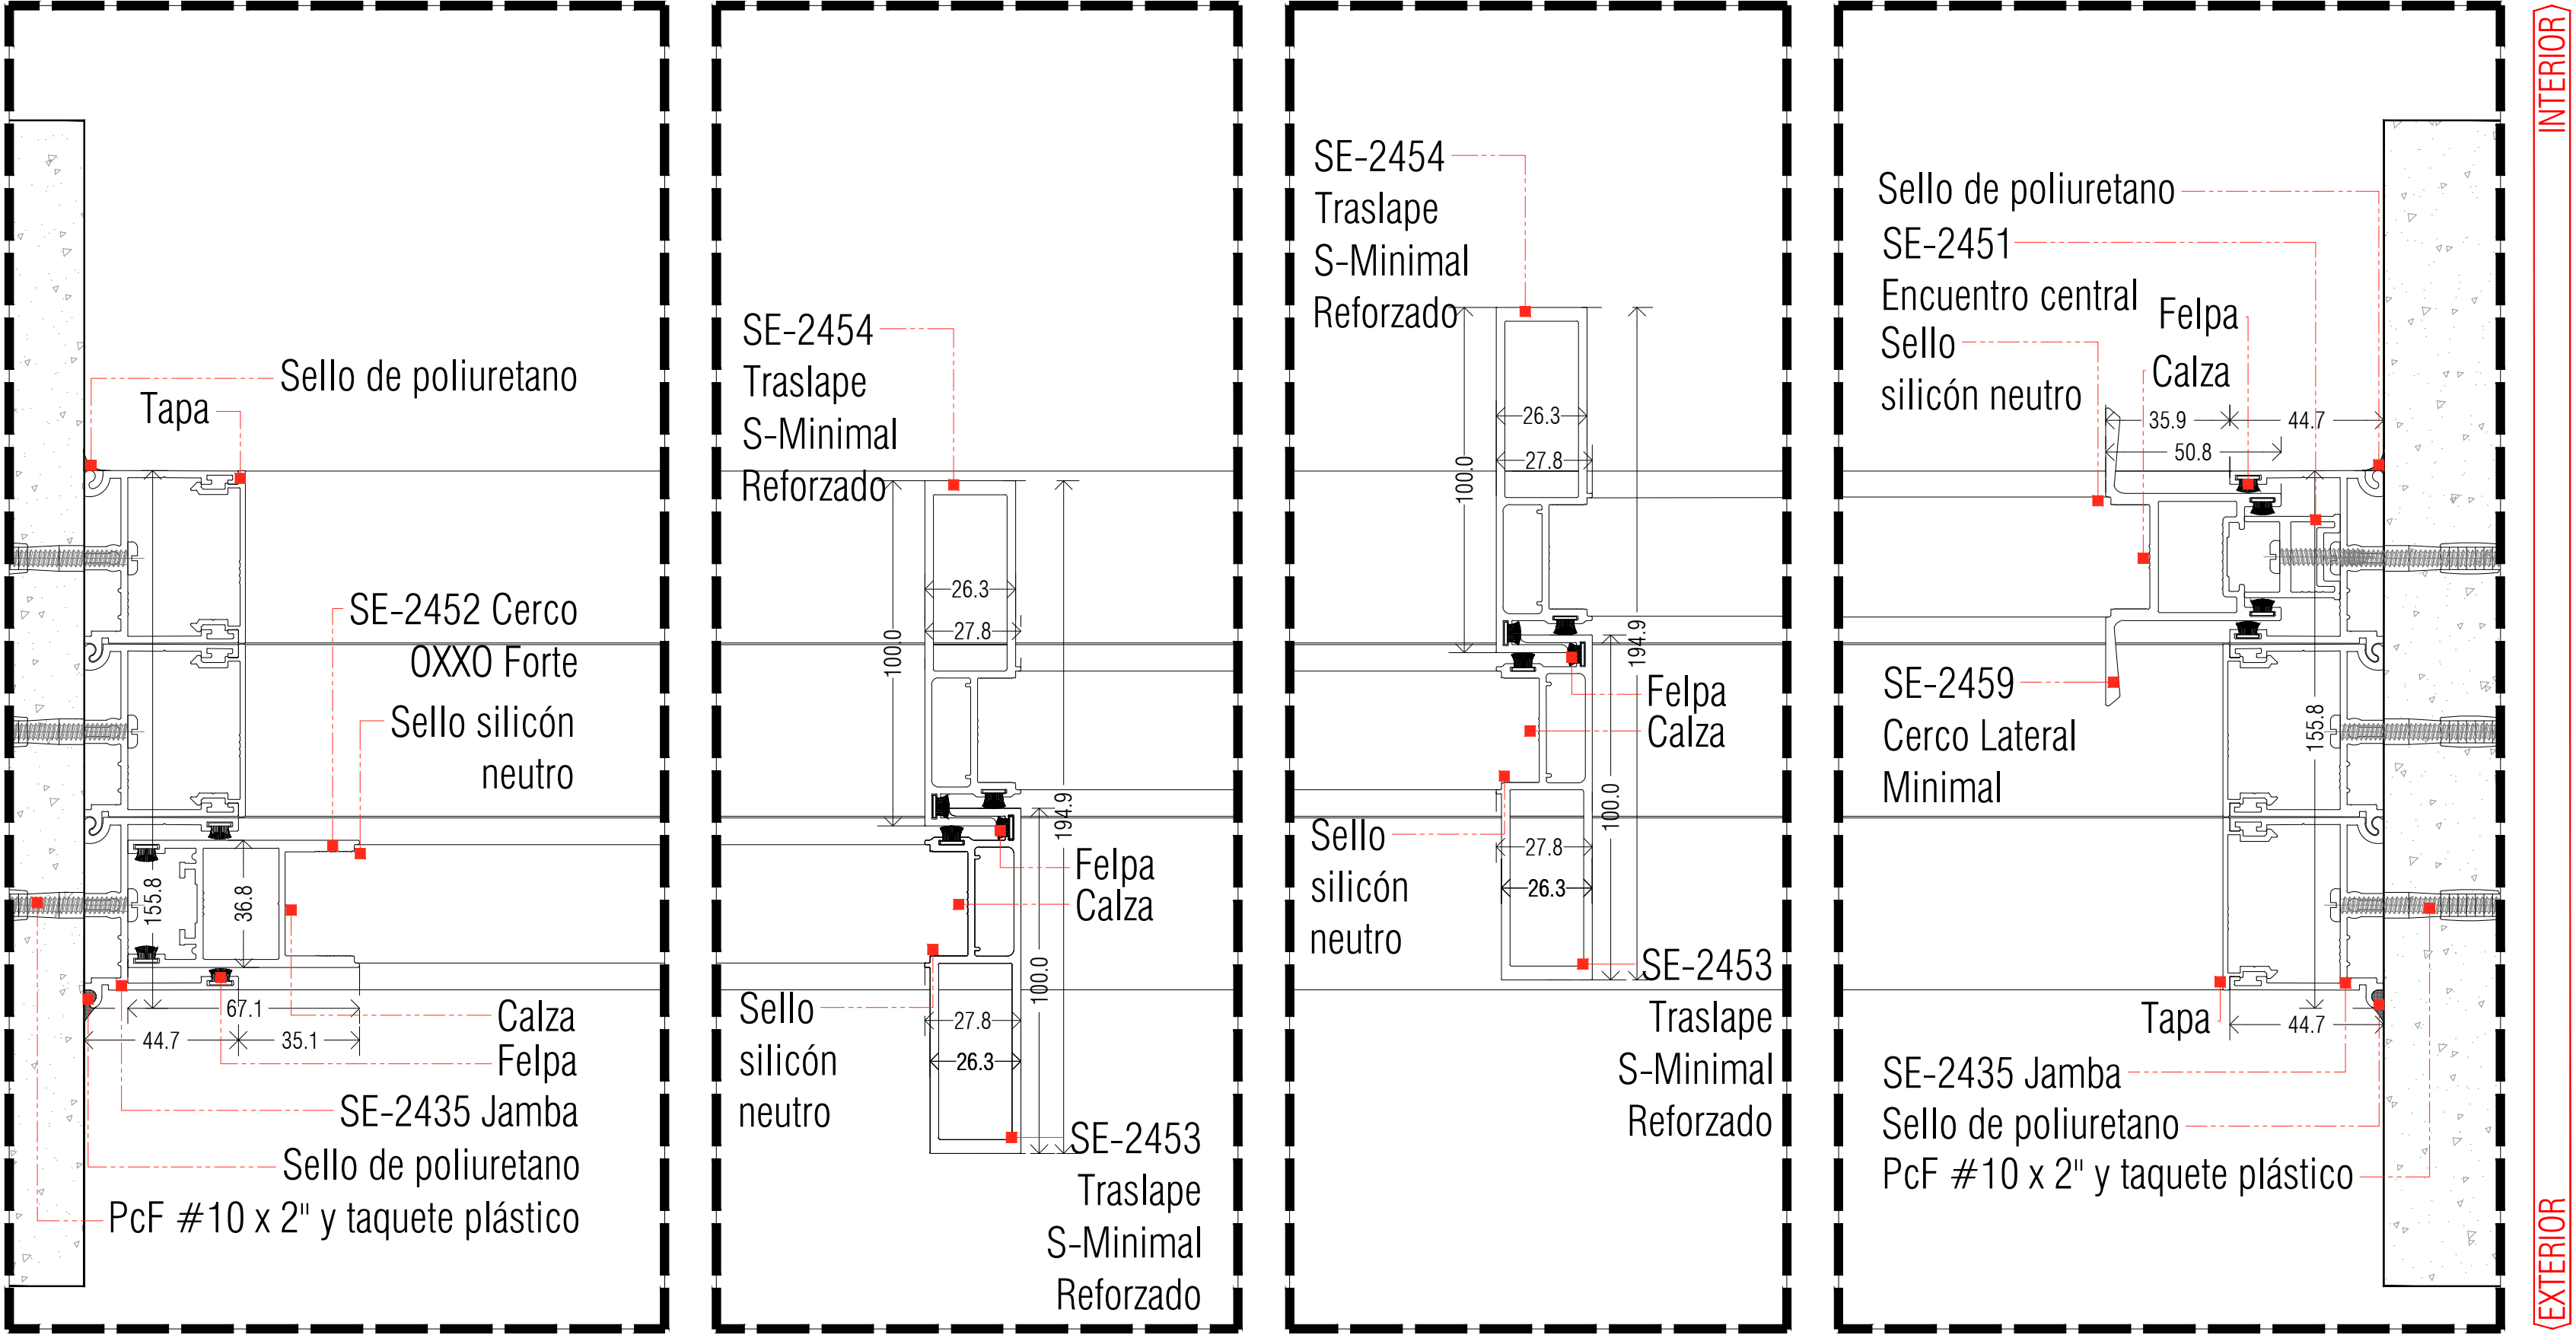

# TYPES OF OPERATOR | OPENING

With high quality locking systems, the system **SEICENTO** offers multiple variations in types of operators and opening. Giving the user solutions outside the regular market, with the guarantee of exceeding expectations in quality and functionality over time.

- Cast iron trolleys with stainless steel wheels.
- Multipoint or single point system, key lock option.
- Handle
- Mortise closure

# CLIENT **REVIEWS**

- X** The perfect match for the needs of our new home.  
Undoubtedly, a superior design guaranteed to last a lifetime.  
**JOSÉ CASAS** Valle de Bravo.
- X** After several consultations with our AviPartner, we found the perfect product that eliminates 80% of the exterior noise and used it in the remodeling of our office.  
**GRISelda MAGAÑA** Interlux, CDMX.
- X** The hotel looks spectacular after the change in the The Doors & Window Systems that we found in AviGlass.  
**JAVIER ROBLEDO** Posadas Group, Los Cabos.
